

ERK 1/2 Monoclonal Antibody

Description

Product type	Primary Antibody
Code	BT-MCA0506
Host	Mouse
Isotype	IgG
Size	50ul, 100ul
Immunogen	Purified recombinant fragment of human ERK 1/2 expressed in E. Coli.
Mol wt	N/A
Species reactivity	Human, Mouse
Clonality	Monoclonal
Recommended application	WB, IHC-p, IF, FCM, ELISA
Concentration	1 mg/ml
Full name	Mitogen-activated protein kinase 1
Synonyms	MAPK1; MAPK3

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

This gene encodes a member of the MAP kinase family. MAP kinases, also known as extracellular signal-regulated kinases (ERKs), act as an integration point for multiple biochemical signals, and are involved in a wide variety of cellular processes such as proliferation, differentiation, transcription regulation and development. The activation of this kinase requires its phosphorylation by upstream kinases. Upon activation, this kinase translocates to the nucleus of the stimulated cells, where it phosphorylates nuclear targets. One study also suggests that this protein acts as a transcriptional repressor independent of its kinase activity. The encoded protein has been identified as a moonlighting protein based on its ability to perform mechanistically distinct functions. Two alternatively spliced transcript variants encoding the same protein, but differing in the UTRs, have been reported.

Recommended Dilution

ELISA: 1:10000

FC: 1:200 - 1:400

IHC: 1:200 - 1:1000

WB: 1:500 - 1:2000

Not yet tested in other applications.

Images

Western Blot analysis using ERK 1/2 Monoclonal antibody against Jurkat (1) HeLa (2) A431 (3) and NIH/3T3 (4) cell lysate.

Immunohistochemistry analysis of paraffin-embedded human Liver tissues with AEC staining using ERK 1/2 Monoclonal antibody.

Flow cytometric analysis of Jurkat cells using ERK 1/2 Monoclonal antibody (green) and negative control (purple).

Storage

-20°C for one year

501 Changsheng S Rd, Nanhū Dist, Jiaxing, Zhejiang, China
