

Flotillin-1 Monoclonal Antibody(6C10)

Description

Product type	Primary Antibody
Code	BT-MCA0561
Host	Mouse
Isotype	IgG
Size	20ul, 50ul, 100ul
Immunogen	Synthetic Peptide of Flotillin-1
Mol wt	262607
Species reactivity	Mouse,Rat,Human
Clonality	Monoclonal
Recommended application	WB
Concentration	1 mg/ml
Full name	Fibronectin
Synonyms	FN1; FN; Fibronectin; FN; Cold-insoluble globulin; CIG

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

This gene encodes fibronectin, a glycoprotein present in a soluble dimeric form in plasma, and in a dimeric or multimeric form at the cell surface and in extracellular matrix. The encoded preproprotein is proteolytically processed to generate the mature protein. Fibronectin is involved in cell adhesion and migration processes including embryogenesis, wound healing, blood coagulation, host defense, and metastasis. The gene has three regions subject to alternative splicing, with the potential to produce 20 different transcript variants, at least one of which encodes an isoform that undergoes proteolytic processing. The full-length nature of some variants has not been determined.

Recommended Dilution

WB: 1:1000-2000

Not yet tested in other applications.

Images

Western blot analysis of 1) Mouse Brain Tissue, 2) Rat Brain tissue diluted at 1:2000.

Storage

-20°C for one year
