

Inhibin Alpha Monoclonal Antibody

Description

Product type	Primary Antibody
Code	BT-MCA0780
Host	Mouse
Isotype	IgG
Size	50ul, 100ul
Immunogen	Purified recombinant fragment of human Inhibin α expressed in E. Coli.
Mol wt	N/A
Species reactivity	Human
Clonality	Monoclonal
Recommended application	IHC-p, IF, ICC, ELISA
Concentration	1 mg/ml
Full name	Inhibin alpha chain
Synonyms	INHA; Inhibin alpha chain

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

This gene encodes a member of the TGF-beta (transforming growth factor-beta) superfamily of proteins. The encoded preproprotein is proteolytically processed to generate multiple peptide products, including the alpha subunit of the inhibin A and B protein complexes. These complexes negatively regulate follicle stimulating hormone secretion from the pituitary gland. Inhibins have also been implicated in regulating numerous cellular processes including cell proliferation, apoptosis, immune response and hormone secretion. Mutations in this gene may be associated with male infertility and premature ovarian failure in female human patients.

Recommended Dilution

ELISA: 1:10000

IF: 1:200 - 1:1000

IHC: 1:200 - 1:1000

Not yet tested in other applications.

Images

Immunohistochemistry analysis of paraffin-embedded human lymphoid (A), ovary tumor (B) and testicle tumor (C) tissues with DAB staining using Inhibin Alpha Monoclonal antibody.

Confocal immunofluorescence analysis of HeLa cells using Inhibin Alpha Monoclonal antibody (green). Red: Actin filaments have been labeled with DY-554 phalloidin. Blue: DRAQ5 fluorescent DNA dye.

Storage

-20°C for one year

501 Changsheng S Rd, Nanhu Dist, Jiaxing, Zhejiang, China
