

PRMT4 Monoclonal Antibody

Description

Product type	Primary Antibody
Code	BT-MCA1064
Host	Mouse
Isotype	IgG
Size	50ul, 100ul
Immunogen	Purified recombinant human PRMT4 (C-terminus) protein fragments expressed in E.coli.
Mol wt	N/A
Species reactivity	Human,Mouse,Rat,Bovine,Pig
Clonality	Monoclonal
Recommended application	WB
Concentration	1 mg/ml
Full name	Histone-arginine methyltransferase CARM1
Synonyms	CARM1; PRMT4; Histone-arginine methyltransferase CARM1; Coactivator-associated arginine methyltransferase 1; Protein arginine N-methyltransferase 4

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

This gene belongs to the protein arginine methyltransferase (PRMT) family. The encoded enzyme catalyzes the methylation of guanidino nitrogens of arginyl residues of proteins. The enzyme acts specifically on histones and other chromatin-associated proteins and is involved in regulation of gene expression. The enzyme may act in association with other proteins or within multi-protein complexes and may play a role in cell type-specific functions and cell lineage specification. A related pseudogene is located on chromosome 9.

Recommended Dilution

WB: 1:1000 - 1:2000

Not yet tested in other applications.

Images

Western Blot analysis using PRMT4 Monoclonal antibody against A431, K562 cell lysate.

Storage

-20°C for one year
