

STAT1 mouse Monoclonal Antibody(8H11)

Description

Product type	Primary Antibody
Code	BT-MCA1161
Host	Mouse
Isotype	IgG
Size	20ul, 50ul, 100ul
Immunogen	Synthetic Peptide of STAT1 at AA range of 640-720
Mol wt	N/A
Species reactivity	Human,Rat,Mouse
Clonality	Monoclonal
Recommended application	IHC-p, IF
Concentration	1 mg/ml
Full name	STAT1
Synonyms	STAT1

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

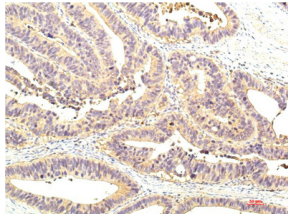

The protein encoded by this gene is a member of the STAT protein family. In response to cytokines and growth factors, STAT family members are phosphorylated by the receptor associated kinases, and then form homo- or heterodimers that translocate to the cell nucleus where they act as transcription activators. This protein can be activated by various ligands including interferon-alpha, interferon-gamma, EGF, PDGF and IL6. This protein mediates the expression of a variety of genes, which is thought to be important for cell viability in response to different cell stimuli and pathogens. Two alternatively spliced transcript variants encoding distinct isoforms have been described.

Recommended Dilution

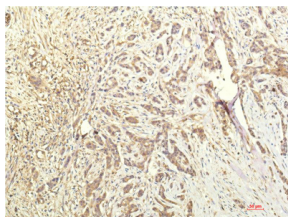

IHC: 1:100-200

Not yet tested in other applications.
