

Alpha-tubulin Monoclonal Antibody

Description

Product type	Primary Antibody
Code	BT-MCA1310
Host	Mouse
Isotype	IgG
Size	20ul, 50ul, 100ul
Immunogen	Recombinant Protein of Tubulin alpha-1A chain
Mol wt	50433
Species reactivity	Zebrafish
Clonality	Monoclonal
Recommended application	WB
Concentration	1 mg/ml
Full name	Tubulin alpha-1A chain
Synonyms	TUBB3; TUBB4; Tubulin beta-3 chain; Tubulin beta-4 chain; Tubulin beta-III

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

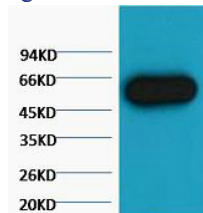

This gene encodes a class III member of the beta tubulin protein family. Beta tubulins are one of two core protein families (alpha and beta tubulins) that heterodimerize and assemble to form microtubules. This protein is primarily expressed in neurons and may be involved in neurogenesis and axon guidance and maintenance. Mutations in this gene are the cause of congenital fibrosis of the extraocular muscles type 3. Alternate splicing results in multiple transcript variants. A pseudogene of this gene is found on chromosome 6.

Recommended Dilution

WB: 1:500-10000

Not yet tested in other applications.

Images

Western blot analysis of Zebrafish skeletal muscle, (Zebrafish Specific) diluted at 1:5000.

Storage

-20°C for one year
