

Phospho-Catenin-Beta (S33) Polyclonal Antibody

Description

Product type	Primary Antibody
Code	BT-PHS00046
Host	Rabbit
Isotype	IgG
Size	20ul, 50ul, 100ul
Immunogen	The antiserum was produced against synthesized peptide derived from human Catenin-beta around the phosphorylation site of Ser33. AA range:17-66
Mol wt	85497
Species reactivity	Human, mouse, rat
Clonality	Polyclonal
Recommended application	IHC-p, IF, WB, ELISA
Concentration	1 mg/ml
Full name	Phospho-Catenin-beta (S33) Antibody
Synonyms	CTNNB1; CTNNB; OK/SW-cl.35; Catenin beta-1; Beta-catenin

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

Catenin beta-1 encoded by CTNNB1 is part of a complex of proteins that constitute adherens junctions (AJs). AJs are necessary for the creation and maintenance of epithelial cell layers by regulating cell growth and adhesion between cells. The encoded protein also anchors the actin cytoskeleton and may be responsible for transmitting the contact inhibition signal that causes cells to stop dividing once the epithelial sheet is complete. Finally, this protein binds to the product of the APC gene, which is mutated in adenomatous polyposis of the colon. Mutations in this gene are a cause of colorectal cancer (CRC), pilomatixoma (PTR), medulloblastoma (MDB), and ovarian cancer. Three transcript variants encoding the same protein have been found for this gene.

Recommended Dilution

WB: 1: 500 - 2000

IHC: 1: 100 - 1: 300

IF: 1: 200 - 1: 1000

ELISA: 1: 10000

Not yet tested in other applications.
