

Phospho-C/EBP Epsilon (T74) Polyclonal Antibody

Description

Code

Product type Primary Antibody BT-PHS00911

Host Rabbit

IgG Isotype

20ul, 50ul, 100ul Size

The antiserum was produced against synthesized peptide derived from human C/EBP-epsilon around the Immunogen

phosphorylation site of Thr74. AA range:40-89

Mol wt 30603

Species reactivity Human

Clonality Polyclonal

WB, IHC-p, IF, ELISA Recommended application

Concentration 1 mg/ml

Full name Phospho-C/EBP epsilon (T74) Antibody

CEBPE; CCAAT/enhancer-binding protein epsilon; C/EBP epsilon Synonyms

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

The CCAAT/enhancer binding protein epsilon encoded by CEBPE is a bZIP transcription factor which can bind as a homodimer to certain DNA regulatory regions. It can also form heterodimers with the related protein CEBP-delta. The encoded protein may be essential for terminal differentiation and functional maturation of committed granulocyte progenitor cells. Mutations in this gene have been associated with Specific Granule Deficiency, a rare congenital disorder. Multiple variants of this gene have been described, but the full-length nature of only one has been determined.

Recommended Dilution

WB: 1: 500 - 1: 2000 IHC: 1: 100 - 1: 300 IF: 1: 200 - 1: 1000 ELISA: 1: 20000

Not yet tested in other applications.
