# Recombinant Rat Heparin-binding EGF-like Growth Factor protein

Code CD00118

**Storage:** This lyophilized preparation is stable at 2-8°C, but should be kept at -20°C for long term storage, preferably desiccated. Upon reconstitution, the preparation is stable for up to one week at 2-8°C. For maximal stability, apportion the reconstituted preparation into working aliquots and store at -20°C to -70°C. Avoid repeated freeze/thaw cycles.

## Intended Use

This product is for research use only, not for use in diagnosis procedures. It is highly recommended to read this instruction entirely before the use.

## Source

Escherichia coli.

## Molecular Weight

Approximately 9.7 kDa, a single non-glycosylated polypeptide chain containing 86 amino acids.

## Purity

> 95 % by SDS-PAGE and HPLC analyses.

## Biological Activity

Fully biologically active when compared to standard. The ED50 as determined by a cell proliferation assay using Mouse Balb/c 3T3 cells is less than 1 ng/ml, corresponding to a specific activity of  $> 1.0 \times 10^6$  IU/mg.

## Physical Appearance

Sterile Filtered White lyophilized (freeze-dried) powder.

## Formulation

Lyophilized from a 0.2 µm filtered concentrated solution in PBS, 300 mM NaCl, pH 7.4, 5 % trehalose.

## Sequence

DLEGTDLDLF KVAFSSKPQA LATPGKEKNG KKKRKGKGLG KKRDPCLKKY KDYCIHGECR YLKELRIPSC HCLPGYHGQR CHGLTL

## Endotoxin

Less than 1 EU/µg of rRtHB-EGF as determined by LAL method.

## Reconstitution

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Reconstitute in sterile distilled water or aqueous buffer containing 0.1 % BSA to a concentration of 0.1-1.0 mg/mL. Stock solutions should be apportioned into working aliquots and stored at  $\leq -20$  C. Further dilutions should be made in appropriate buffered solutions.
